EAST PRUSSIA AGAIN
INVADED BY RUSSIANS

Russian Hordes Pillage and Burn Villages—Tens of Thousands Retaliate by Burning Polish Towns.

London, March 20.—A new Russian drive through East Prussia to attack Koeningburg from the north is believed to be indicated by the invasion of the northernmost corner of the German empire by Russian raiders, who have occupied Memel, a fortified town of 20,000 on the Baltic, at the point where only ten miles of German territory lies between the sea and the Russian frontier.

An official statement issued by the Petrograd war office says the Russian troops have won a complete success "before" Memel, while the Berlin announcement says "It would appear that minor Russian detachments have entered Memel."

"The situation in the vicinity of Memel, in East Prussia, is not yet clear," says the German statement. "It would appear that minor Russian detachments have entered Memel. Counter measures have been taken."

By FREDERICK WERNER.

International News Service Correspondent. Berlin, March 19.—French aviators have bombed Schlestadt in Upper Alsace and German aviators have bombed Calais. It is announced in an official statement issued by the general staff here, the statement admits that fighting is in progress between Germans and Russians upon Prussian soil, the Russians having been able to cross the boundary again.

The general staff makes announcement that for every village seized upon German soil burned by the Russians the Germans will destroy three Russian villages. It is further announced that, if the Russians burn any buildings of the German city of Memel, public buildings in the provincial capital of Poland will be destroyed by the Germans.

By FRANCIS LAVELLE MURRAY.

FEDERAL AID
FOR KENTUCKYFOUR ENGINEERS COMING TO
HELP IN SUPERVISING
THE ROADS.

WILL SAVE STATE EXPENSE

Assistance Also to Be Given on Bridge Plans—Gov. McCreary and Commissioner Terrell Return.

(Special Frankfort Correspondence.)

Frankfort—Commissioner of Roads R. C. Terrell and Gov. McCreary have returned to Frankfort, pleased with the success of their trip to ask for federal aid in road construction in Kentucky this year. Commissioner Terrell said the Department of Agriculture consented to detail four highway engineers for duty in Kentucky, one of whom will arrive at once. They will be assigned to designated territories, each probably being given ten counties to travel over. They will supervise the road construction under the state-aid plan for the State Department of Roads, and give advice to county engineers, just as government farm demonstrators aid the agriculturists.

Besides these four field men assigned to the State, Gov. McCreary and Commissioner Terrell secured permission to send the excess bridge work to the Bureau of Highways, Washington. All bridges costing more than \$500 are built under plans and specifications furnished by the Commissioner of Roads, and this work, in addition to the highway plans under state aid, will crowd the office here. The work which can not be got out in this office without hampering its other activities will be sent to Washington. Commissioner Terrell said this will save his office the expense of three extra engineers.

Vote on Two Amendments.

Kentucky will be called upon this year to vote on two most important constitutional amendments—the working of convicts on public roads and the vital importance one which involves the question of retaining the present antiquated, grossly unjust system of taxation—both of which drive capital from the state—or of establishing a system under which intangible property will be made to bear its just proportion of tax burdens. Under the present system it is within the limit to say that the owner of visible property pays not less than 85 per cent of the taxes collected, while the greater part of the remaining 15 per cent goes into the pockets of tax inquirers and their lawyers. It is true that Kentucky voted largely in favor of both amendments last year, but the will of the people was choked off by the negligence of the secretary of state in failing to give due and legal notice of the submission. That is the way the court of appeals viewed it, and Kentucky will have to bear the burden of another expensive election because of neglect on the part of the secretary.

Suggest McCreary for Commissioner.

The President received Gov. James McCreary, when in Washington at the executive offices. The governor, who was in Washington in the interest of the good roads movement in Kentucky, called with Senator James to talk his respects. There is a rumor afloat here that practically all the Democratic factions in Kentucky have recommended Gov. McCreary to the President as a member for an American Peace Commission, should one be appointed, to draw up articles of settlement of the European war. The governor is one of the fathers of the arbitration movement. Gov. McCreary announced that in all seven Federal engineers would be sent to Kentucky to instruct in all road work. Four are road engineers and the other three are bridge officers. The governor, with Secretary Bryan, attended the Pan-American conference at the Union Building this morning and was shown by Director Barrett where his portrait is to hang. It introduced the Pan-American conference in Congress and

Governor Without Knowing It. State Senator M. O. Scott, of Edmonson, president pro tem of the Senate, was governor for about two hours, but probably unaware of the distinction. Both Gov. McCreary and Lieut. Gov. McDermott were out of the state, the former in the east and the latter in Cincinnati delivering a St. Patrick's day address. As Lieut. Gov. McDermott remained across the river only long enough to make his speech, and then crossed back to Covington, it was not considered necessary to disturb the slumbers or the peace of the unconscious bearer of the brief dignity and responsibility by notifying him.

BOMBS DROPPED BY ZEPPELINS

RAIDED PARIS AND VICINITY AND DROPPED FIFTY BOMBS—LITTLE DAMAGE DONE.

British Steamer Cairntorr Torpedoed and Sunk—Shot Stops German Steamer.

Western Newspaper Union News Service. Paris.—Zeppelin airships raided Paris and vicinity and dropped half a hundred bombs, but the damage done was unimportant. Seven or eight persons were injured, but only one seriously. Several of the aircraft started for the capital, following the Valley of the Oise, but only two reached their goal. Missiles also were dropped at Compiègne, Ribecourt and Dreilincourt, but without serious result. Paris remained calm while the aerial invasion was in progress and residents of the city exhibited more curiosity than fear as to the result. Trumpets gave the signal that all lights must be extinguished as soon as warning was received of the Zeppelin's approach. Searchlights were turned upon the clouds, anti-aircraft guns opened fire and aeroplanes rose to attack the Germans, but their operations were hampered by a heavy mist.

British Steamer Torpedoed.

London.—The British steamer Cairntorr was torpedoed off Beachy Head in the English Channel, and sank, according to a Central News dispatch from Eastbourne. Her crew escaped. When the steamer was struck rescue boats put out to her and attempted to tow her into port. She sank eight miles off, however. The Cairntorr was bound from New Castle for Genoa with coal. The Cairntorr was a vessel of 2,293 tons and was built in Sunderland in 1904. She was owned by the Cairn Line of New Castle.

Shots Stop German Steamer.

San Juan, Porto Rico.—The German merchant steamer Odenwald, which attempted to leave port without obtaining clearance papers, was stopped as she was passing out the entrance to the harbor by two shots across her bow from a five-inch gun and direct shots from a machine gun. She then turned and was taken in charge by the American Collector of Customs. Permission to sail was refused the Odenwald by the Collector, pending instruction from Washington. The steamer has been at San Juan since August. She was bound for European ports from the West Indies with freight and passengers, and sought refuge here.
